

ABSTRACT OF THE DISCLOSURE**SPECIFYING AUDIO OUTPUT ACCORDING TO WINDOW GRAPHICAL
CHARACTERISTICS**

5

A method, system, and program for specifying audio output according to displayable object graphical characteristics are provided. A graphical characteristic of at least one displayable object within a user interface is detected. An audio output of a sound associated with at least one displayable object is adjusted to reflect the graphical characteristic, such that the audio output is specified according to a graphical display within the user interface.
